

Updating Partek Flow

Before performing updates, we recommend [Backing Up the Database](#).

Updates are applied using the Linux package manager.

Make sure Partek Flow is stopped before updating it.

\$ service partekflowd stop

To update Partek Flow, open a terminal window and enter the following command.

For Debian/Ubuntu, enter:

\$ sudo apt-get install partekflow

For Redhat/Fedora/CentOS, enter:

\$ sudo yum update partekflow

For the YUM package manager, if updating Partek Flow fails with a message claiming "*package not signed*," enter:

\$ yum --nogpgcheck -y update partekflow

Note that our packages are signed and the message above is erroneous.

For tomcat build update, download the latest version from below:

wget --content-disposition packages.partek.com/linux/flow

Additional Assistance

If you need additional assistance, please visit [our support page](#) to submit a help ticket or find phone numbers for regional support.
