

LDAP Configuration

Partek Flow user accounts can be tied to an organization's Lightweight Directory Access Protocol (LDAP) database. These can be configured by administrator accounts using the LDAP Configuration menu (Figure 1). Click on the  icon to edit the LDAP configuration. Enter the settings relevant to your domain. Consult with your organization's LDAP database administrator for assistance with configurations. For more information about any of the fields, mouse over the .

Once the LDAP settings have been successfully configured, proceed to the User management section of the Settings page then click on  Add new user. The Source is... checkbox should be checked and will denote the name of the LDAP configuration entered. Typing a few characters of the username will prompt Partek Flow to suggest users that are available in your LDAP database to add.

LDAP database

Database name	<input type="text" value="LDAP"/>	i
Provider URL	<input type="text" value="ldaps://ldapserver:636"/>	i
