

System Queue

The System queue page gives you the list of system-related tasks performed on your Partek® Flow® server (Figure 1). These tasks generally benefit all the users of the server. They include, but are not restricted to, downloading annotation databases and building aligner indexes.

Figure 1. Viewing the System queue

Filter to a specific task by entering keywords in the Task search box. Use the drop-down menu under the corresponding column header to filter tasks to specific users/date ranges and statuses. The progress of ongoing system tasks is displayed as a bar in the Status column. Cancel any ongoing task by clicking the ✖ button.
