Task Management

Partek® Flow® supports multiple versions of analysis tools, including third-party software (e.g. aligners). By default, the most recent versions are implemented during installation of Partek Flow. In some circumstances, you may need to use a different version of a tool, e.g. if reproducing an older study. Furthermore, tasks can be enabled and disabled.

Task Management Page

Only Partek Flow users with administrator privileges have access to the *Task management* page. Changes made on this page are applied to all other users on the Partek Flow instance. To access the page, click the avatar in the top right corner, choose **Settings** and click **Task management** on the left (Figure 1).

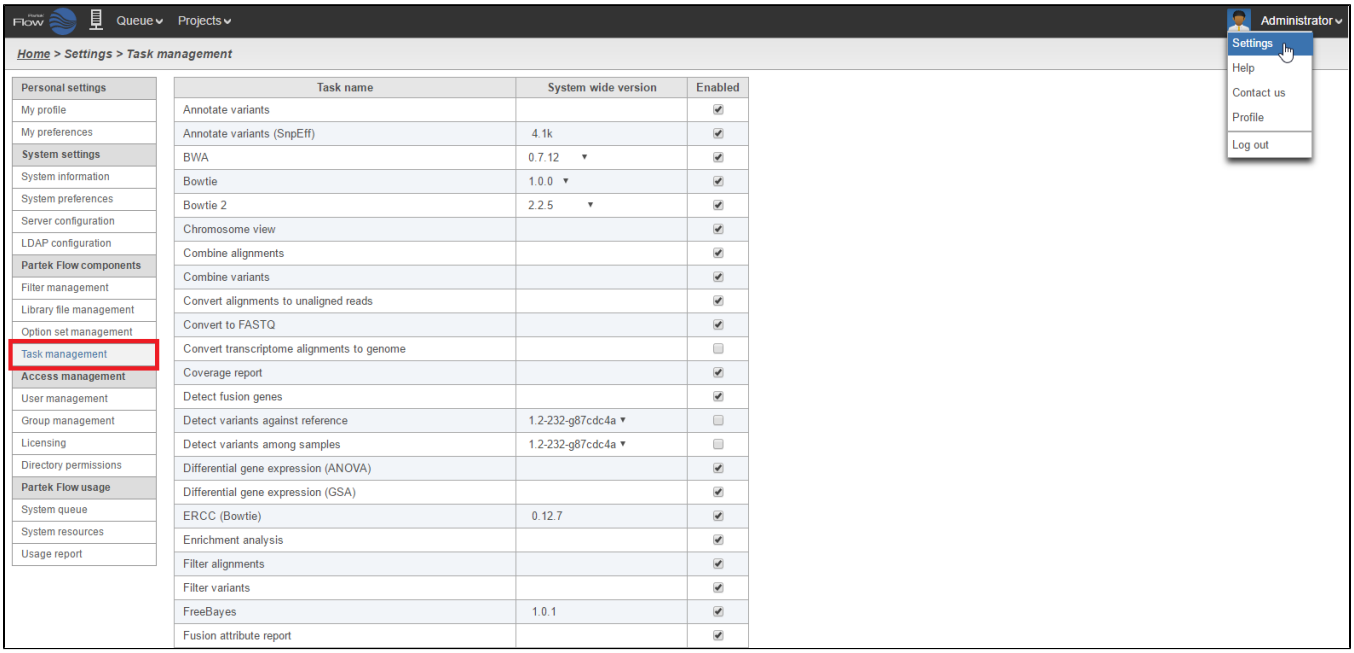

Figure 1. Task management page. The table shows one task per row and the current system wide version for each task

To enable or disable a task, select or deselect the checkbox next to the *Task name* on the T*ask management* page, respectively (Figure 1).

To change the version of a task, click the **arrow** (▼) icon and choose a different version from the drop-down list (Figure 2). All tasks launched after the change will use the chosen version.

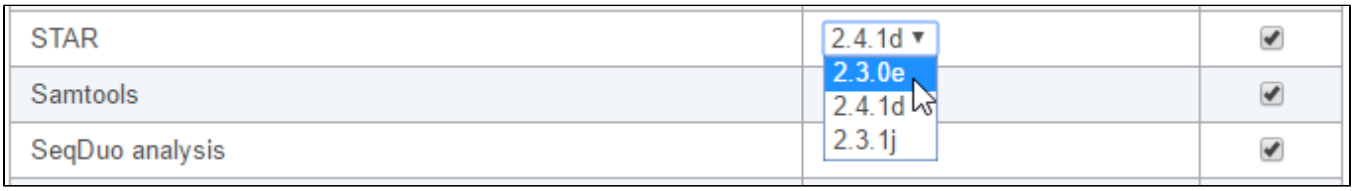

Figure 2. Choose a new version from the drop-down list

To review which version has been used to perform a task, hover the cursor over the task node and inspect the pop-out balloon (Figure 3). Alternatively, the version number is shown on the *Task details* (Figure 4) page and the *Data summary report* (Figure 5).
