

Importing a Pipeline

Pre-built pipelines are available for download from the Partek[®] website. Please note, we are continually updating and improving our collection of pre-built pipelines. If you have any suggestions for improving any of the pre-built pipelines or suggestions for additional pipelines, please contact Partek technical support (support@partek.com). In addition, pipelines can be imported from your local machine.

From Hosted Pipelines

1. Click the **Import a pipeline** link at the bottom of the screen under the *Analyses* tab (Figure 1).

Figure 1. Import a pipeline link below the Analyses tab

2. Select **Hosted pipelines** at the top of the *Import pipeline* page (Figure 2). This will display all available pre-built pipelines hosted by Partek.

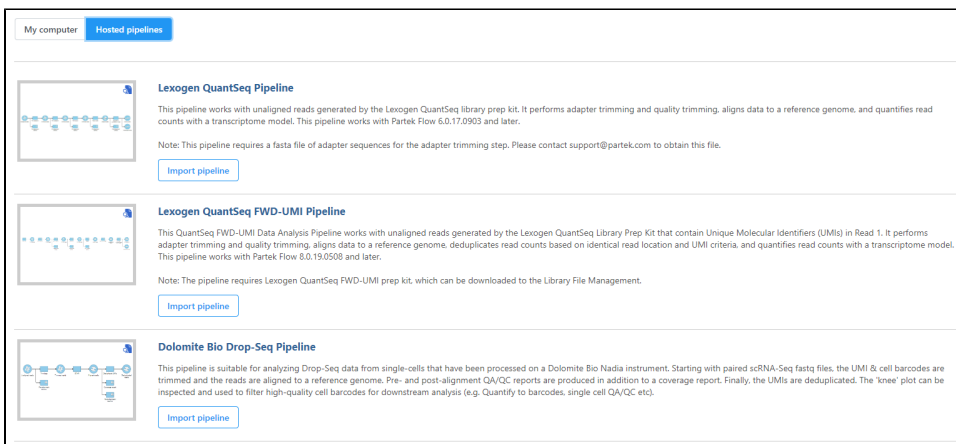

Figure 2. Pre-built pipelines that can be imported from the Partek website. To preview a pipeline to see more detail, click the pipeline image

3. Click the **Import pipeline** button next to the pipeline you wish to import (Figure 2). Alternatively, click **Import all pipelines** at the bottom of the page to import all pipelines displayed.

You will be redirected back to the *Analyses* tab. When you select a circular data node, the newly imported pipeline will be available in the *Pipelines* section in the menu on the right (see *Running a Pipeline*).

From My Computer

To import a .pipeline file from your local machine into Partek® Flow®:

1. Click the **Import a pipeline** link at the bottom of the screen under the *Analyses* tab (Figure 1)
2. By default, **My computer** is selected at the top of the *Import pipeline* page. Click the **Choose file** button (Figure 3)
3. Browse to the location of the .pipeline file on your local machine and select it for upload. The selected file name will be displayed next to the *Choose pipeline* button (Figure 3)
4. If you wish to give the pipeline a new name, type a new name into the *Rename pipeline* box (Figure 3) and click **Import**.

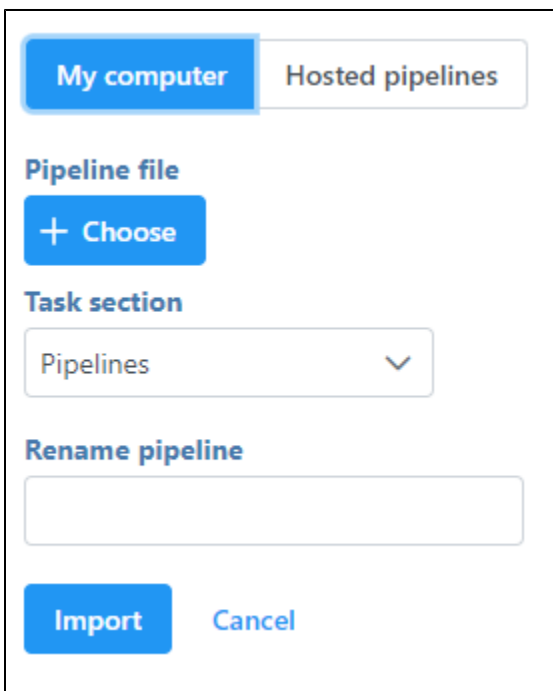

Figure 3. Importing a pipeline from your local machine

You will be redirected back to the *Analyses* tab. When you select a circular data node, the newly imported pipeline will be available in the *Pipelines* section in the menu on the right (see [Running a Pipeline](#)).
