

Update Library Index

The library index is a file that contains download sources for all Partek distributed library files. An automatic update of this file will occur every 24 hours (Figure 1), so this normally doesn't require any attention. If you do wish to manually update the library index, click **Update Library Index** at the bottom of the [Library file management page](#). To check for recent updates, click [here](#).

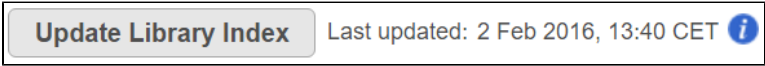

Figure 1. The date and time the library index was last updated is displayed at the bottom of the library file management page

Additional Assistance

If you need additional assistance, please visit [our support page](#) to submit a help ticket or find phone numbers for regional support.
